Denver Travel & Adventure Show: Construction and Transportation Update

Two coordinated infrastructure projects will be taking place in downtown Denver during the Denver Travel & Adventure Show at the Colorado Convention Center (CCC):

- **Stout Street Closure:** Beginning September 1, 2026, through approximately mid-March 2027, the City and County of Denver will close Stout Street between Speer Boulevard and 14th Street to modernize the Colorado Convention Center's fire protection infrastructure. During this closure, the CCC's **North and West Shuttle Drop-Off locations** will be temporarily unavailable. Because many attendees use Stout Street for pick-ups and drop-offs, please review the detour map outlining alternative routes around the Colorado Convention Center.
- **Downtown Rail Construction:** The Regional Transportation District (RTD) is continuing its Downtown Rail Reconstruction Project through mid-March 2027. During the event, work is expected to be on California Street between 19th and 15th Streets. For additional information on this project, please visit the RTD Downtown Rail Reconstruction Project.

Parking Information: The **Colorado Convention Center Parking Garage** is located off Speer Boulevard and is **not impacted** by this closure. We highly recommend utilizing the Colorado Convention Center Parking Garage for any parking needs.

We appreciate your understanding and flexibility as Denver invests in these important infrastructure improvements.
